## FOREWORD

### INVENTORY OF LANDS CONTROLLED BY THE MONTANA FISH AND GAME COMMISSION

This inventory represents a current listing of the lands controlled by the Montana Fish and Game Commission under patent, deed, lease, easement, agreement, or withdrawal. Acquisition of land by the Commission is controlled by budgetary limitations set by the Montana State Legislature.

GAME MANAGEMENT AREAS usually serve several purposes. Winter ranges for elk, and waterfowl production areas are the predominant purposes of these areas. Other species of big game, as well as upland game birds and furbearers, are also considered in the management plans for these areas. Opportunities for public hunting and fishing exist at many of these locations as well as viewing and photographing game and non-game wildlife species.

FISHING ACCESS AREAS are located along lakes, streams, and rivers and assure permanent public access to prime fishing waters. Rights of way are included to provide access from the nearest public roads. Many of these areas are developed for appropriate outdoor recreation use and provide relief from heavy public use on private lands.

STATE PARKS, MONUMENTS, AND RECREATION AREAS are comprised of areas with scenic, scientific, historical, archaeological or recreational significance. These areas represent outstanding examples of the state's natural and cultural resources for the use and benefit of the public. The lands and appurtenant facilities are managed to provide maximum recreational opportunities to Montana's residents and visitors.

The other areas, including FISH HATCHERIES, ADMINISTRATIVE SITES and BIRD FARMS are small in size and specialized in the services which they provide.

State law requires the Montana Fish and Game Commission to make payments in lieu of taxes. The commission owned lands in each county are assessed and annual payment is made in the same amount, as if the lands were privately owned. These payments in lieu of taxes are not required for lands totaling less than 100 acres per county, nor for lands used as bird farms or fish hatcheries.
